FOREWORD

The Labour Market Information and Research Division of the Department of Employment, Ministry of Labour and Human Resources is pleased to release the third Establishment Survey Report 2016. The statistics collected are based on the survey conducted from 28th February 2016 to 28th March 2016 by a team of 31 enumerators, 12 supervisors and 1 field coordinator to oversee the survey process.

The survey is an effort of the Ministry to help understand the current scenario of potential sectors across the country at a given point of time. Moreover, it also helps comprehend the various challenges faced by these sectors restricting their growth.

It is hoped that the report will serve as a useful tool to evaluate development policies and programs in both formal and informal sectors which provide a major indicator on the current employment status that would facilitate employment promotion.

We would like to extend our sincere gratitude to all the representatives of the business communities, and individuals who participated in the survey.

We would also welcome valuable comments and suggestions for the improvement of the report in future.

SECTION 1: INTRODUCTION

The share of secondary and tertiary economic sectors to Bhutan's Gross Domestic Product has grown remarkably over the past decades. The secondary sector contributed 40.55 percent of the total GDP and the tertiary sector 41.52 percent (National Accounts Statistics 2015). While their contribution to the country's socio-economic development is growing, it is also imperative that this growth also resonates into growth in their employability potential.

The survey is a comprehensive study pertaining to the major economic sectors such as manufacturing, construction and agriculture. It is mainly intended to study the issues and challenges that these potential establishments in the Bhutanese economy are facing in terms of expanding their businesses.

Establishment Survey 2016 has been guided by the following broad objectives:

- To study potential sectors of employment in Bhutan by their characteristics (organization type, economic activity, nature of employment and trade regions)
- To study the constraints faced by these potential sectors in further expansion
- To study the extent of implementation of certain employment policies such as Internal Service Rules

Important Definitions:

1. **Establishment** means an economic unit, generally at a single physical location, where business is conducted or where services or industrial operations are performed. It is usually engaged in one predominant type of economic activity.
2. **Main Activity** refers to the specific activity performed by the establishment, e.g. Manufacture of Pepsi, beer, cement, hotel, hydropower etc. For hydropower, the nature of main activity pertains to manufacturing of electricity.
3. **Type of Legal organization:**
 1. Individual/Sole proprietorship: An owner who fully owns his business with full legal rights.
 2. Partnership: A business or an entity owned by two individuals of same nationality for the production of goods or services with common goals.
 3. Private Limited Company: More than 50% of the share owned by private undertaking. (Tashi Commercial Corporation, Jigme Mining Corporation, etc.)

4. Public Limited Company: More than 50% of the share owned by government. (Eg. BoB, PCAL, RICBL, etc)
5. Joint Venture: Business entities owned by Bhutanese and foreign individual. (example: Taj Tashi, Druk PNB, Le Meridian etc)

4. Occupation

Occupation is the type of work, trade or profession performed by the person during the survey period.

5. Category of Establishment:

The category of establishment has been defined based on the employment size and the amount of investment made as per the license issued by the Ministry of Economic Affairs as follows:

- For an establishment to be categorized as “small”, its employment size should be around 5-19 and its investment should be around Nu. 1-10 million.
- An establishment is considered to be “medium” if it has about 20-99 employees working under it and its investment estimates to around Nu. 10-100 million.
- An establishment with 100 or more employees and whose investment was more than Nu. 100 million is considered to be a “large” industry.

Survey Coverage:

The Establishment Survey 2016 covered 6,080 potential sectors in all 20 Dzongkhags of which 5,884 sectors had successfully completed the questionnaire, and the remaining 196 sectors had incomplete questionnaires or refused to participate in the survey. The non-response rate for the survey is at 3.2 percent.

Limitations of the survey:

Although the survey covered all 20 Dzongkhags, it did not reach the remote corners of the country. Small sectors/establishments were also foregone due to lack of formal offices. Since most small establishments especially small class contractors operate their businesses from their own living quarters, it was difficult for the enumerators and supervisors to locate and hold interviews.

SECTION 2: SUMMARY FINDINGS

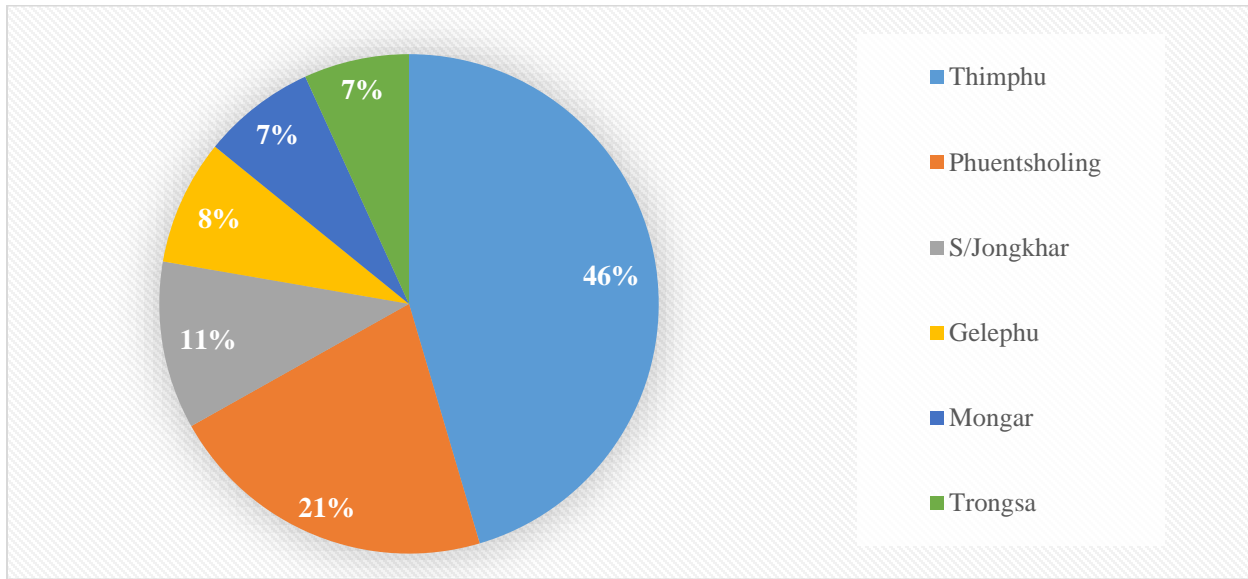

1. Establishment Details

The Establishment Survey 2016 collected information from 5,884 registered establishments across the country – 28.2 percent of the coverage being from Thimphu Dzongkhag followed by Chukha Dzongkhag with 16.8 percent.
